

Director, Clinical Services Delivery

Play a pivotal role in growth and innovation with our Medical Imaging team and help build winning strategies around strengthening our work culture and teams.

With people at the heart of everything we do, we are seeking an accomplished, forward thinking, innovative, and well-rounded senior leader with 10+ years' progressive experience in healthcare and program management.

As Director Medical Imaging, Clinical Services Delivery, you will set the direction for the overall strategy including operational management of programs and services for Medical Imaging. This will involve supporting and promoting patient centered care, staff and patient safety initiatives, staff motivation and support, and best practices to achieve outcomes identified in the Island Health Strategic framework.

This is a great opportunity for a dynamic leader who has working knowledge of planning concepts related to budgetary, staffing, quality and strategic initiatives and the ability to positively lead change while building high-performing teams. Although medical imaging experience would be ideal, it is not a requirement. Excellent executive-level business communication skills, with experience interacting with, and presenting to, Executive Leaders and the Board of Directors is beneficial.

Education, Training and Experience

A level of education, training and experience equivalent to a Master's degree (MA, MBA or MSN), and 10 years of progressive senior management experience in health care/program management is essential.

As a leader, you will be supported every step of the way in your journey as you focus on making a valuable impact on our teams, where you will directly influence patient care over a wide geographic area at multiple sites. Island Health provides sponsored leadership training, supportive and accessible mentorship from a senior leadership team, competitive salary with an exceptional benefits package and the flexibility to live in any of a multitude of communities across Vancouver Island.
